Continued strong growth

Second quarter 2022

I am proud to once again be able to present a quarter with strong growth. Our Q2 turnover of SEK 575 million (487) represents a growth rate of 18%, and we are experiencing significant growth in all segments apart from Staffing. Adjusted EBITDA excluding IFRS 16 amounted to SEK 40 million (45), which is in line with our expectations, although we experienced a decreased margin in comparison to the same quarter in the previous year. The margin has been negatively affected by our continued high rate of growth, as this has required measures such as an expansion of central functions, while the customer mix has also had a negative impact on the margin.

Inflation and interest rates

Our business model and cost structure mean that we are only very marginally affected by the prevailing situation with significant inflation and increased interest rates. Our major costs relate to personnel, premises and transportation, where our revenues are adjusted in line with cost changes. However, we are experiencing a marginal increased cost development due to higher interest rates and electricity costs.

Geographic expansion

Following the acquisition of Niels Bonde Spedition AP and HLT Spedition PS in Denmark in Q1, we have continued to work with the integration of these companies during Q2. The companies have been integrated into Logent's IT infrastructure and organisation in order to create uniformity, and we have also implemented a change of name to "Logent Customs Denmark".

Sales

We continue to see a strong outsourcing trend among customers who are looking for efficient new logistics solutions. Logent's pipeline remains strong, although many processes have been postponed for decision during Q3.

Digitalisation

As previously advised, we are currently investing heavily in digitalisation. The implementation of Logent's new "workforce management system" was completed in Q2, providing us with clearly more efficient processes. Logent's general AI development within Logistics Services has continued, with the aim

of providing increased productivity and quality for our customers.

Sustainability

We are delighted that Jessica Borssén has commenced her role as Head of Sustainability at Logent. This new position is in line with Logent's focus on sustainability and our ambition to accelerate measures aimed at reducing our emissions and increasing our corporate social responsibility. Logent's CO2 emissions during Q2 decreased by 14% compared with the same period last year, due in part to our investments involving conversion of our truck fleet to HVO and electrification of our fleet of company cars. When it comes to our efforts to help people who have difficulty entering the labour market to find permanent jobs, it makes me extremely proud to be able to say that we have helped a total of 62 people so far this year. This means that there are now an additional 14 people who can proudly go to work and earn a wage each and every day, rather than being dependent on social welfare.

We have now entered Q3 2022, a period characterised by focus on growth and continued streamlining. We expect to finalise the contracts for a number of major deals during this quarter, and we also expect to see further effects of our investments in digitalisation.

Significant risks and uncertainties

Risks related to macroeconomic factors and cyclical demand

Through its various operating segments, the Group is active in the logistics market. Like other companies operating in the logistics market, the Group is affected by the general financial and political situation at global, regional and local levels. The general demand for logistics services usually follows the trend in the gross domestic product (GDP) and the levels of trade volumes within the geographical regions where the Group provides its logistics services. The Group is thus mainly dependent on the GDP development and the related development of trade volumes in Sweden, Norway and Denmark, as well as the development in the geographical regions and markets in which the Group's customers operate, as the demand for the Group's logistics services is ultimately affected by the demand for its customers' products. In view of the above, there is a risk that such decrease in demand for the Group's logistics services could affect the business, the operating profit, and the financial position of the Group. For further description of significant risks and uncertainties, see the Annual Report for 2021 or Logent's prospectus regarding listing of the bond on Nasdaq on Logent's website, www.logent.se.

Risks related to Corona

During the second quarter the negative of the pandemic have been limited apart from higher sick leave costs in Norway.

Risk related to war in Ukraine

Logent has so far not seen any major negative business consequence from the war in Ukraine. The development and possible consequence in the future is of course impossible to understand today. Logent management follow the development closely to act quickly on needed business measures if needed.

Notes

1. Notes to consolidated accounts

SSCP Lager BidCo AB (publ), corporate ID number 559109-9154, is a limited company registered in Sweden with registered office in Stockholm. The address of the head office is SSCP Lager BidCo AB, c/o Logent AB Hammarby Kaj 14, SE-120 30 Stockholm, Sweden. The Parent Company and its subsidiaries' operations comprise logistics services.

Unless otherwise stated, all amounts are in thousands of SEK (KSEK).

1.1 Accounting principles

These consolidated accounts were prepared pursuant to the Swedish Annual Accounts Act, RFR 1 Supplementary Financial Reporting Rules for Corporate Groups, and the International Financial Reporting Standards (IFRS) and IFRS Interpretations Committee interpretations (IFRS IC) as approved by the EU. This interim report has been prepared in accordance with IAS 34 Interim Financial Reporting.

The Parent Company applies RFR 2 Financial Reporting for Legal Entities and the Annual Accounts Act. The interim report for the Parent Company has been prepared pursuant to the Annual Accounts Act.

Applied accounting principles are consistent with those described in SSCP Lager BidCo Group's annual report for 2020, unless otherwise expressly stated below.

1.2 Significant accounting estimates and judgements

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom correspond to the actual results. Estimates and assumptions that entail a significant risk of material adjustments to the carrying amounts of assets and liabilities in the next financial year are outlined below.

(a) Test of impairment of goodwill and trademarks

The Group tests each year whether any impairment requirement exists for goodwill and trademarks in accordance with the accounting policy described in the annual report 2021. The recoverable amounts for the cash-generating units were established by calculating the value in use. Certain assumptions must be made for these calculations, of which the most important assumptions are the discount rate and the long-term rate of growth. The carrying amount of goodwill amounted to SEK 940 939 thousand and the carrying amount of trademarks amounted to SEK 135 894 thousand as of 31 December 2021. An impairment test has been performed based on 2021, which shows that there is no need for impairment.

1.3 Segment information

Three reportable segments, Logistics Operations and Logistics Services and Staffing, were identified in the Group:

Logistics Operations - Contract Logistics-solutions relating to dedicated warehouse solutions and ports.

Logistics Services - Contract Logistics-solutions relating to transport management and customs.

Staffing - Staffing solutions related to logistics built to manage volume fluctuations. Both external and internal staffing (e.g. to Contract Logistics) and for recruitment services.

Other - The item Other consist of costs that have not been allocated to the segments.

The Managing Director primarily uses a measure of adjusted earnings before interest, tax, depreciation and amortization (EBITDA, see below) to assess the performance of the operating segments excluding effect of IFRS 16 (see Note 6 and 7).

2. Net sales

Division of revenue from customer contracts

Revenue from contracts with customers essentially comprises the sale of services. The Group's revenue from contracts with customers is distributed among the categories described below. The majority of the Group's revenue is recognized over time. External revenue per segment is reported below.

From 2021, the division of revenue from customer contracts has changed so that the previous categories Warehousing and Ports have been merged into Logistics Operations. The comparative figures for previous periods are updated accordingly. The accounting principles in other respects for net sales are unchanged and follow the previously published annual report.

4. Alternative Performance Measures

The primary alternative performance measures presented relate to EBITA, EBITDA, net debt, adjusted EBITA and EBITDA excluding items affecting comparability and effect of IFRS 16. Below is a reconciliation of the alternative performance measures and a description of the purpose of these.
