

# Environmental Policy

## Introduction

Logent firmly believes that our operations should be conducted in the most sustainable way possible and that we should always seek to reduce our impact on the climate and the environment.

## General Principles

Logent's overall objective is to:

- Phase out the use of fossil fuels;
- Only use green electricity contracts;
- Reduce the generation of waste in our operations;
- Reduce our climate footprint.

## Policy, Rules, and Procedures

Each workplace shall actively pursue environmental improvement efforts and continuously work to minimise our impact on the climate and environment. This shall be done in consultation with the customer, in-house resources, and external expertise.
